How would you manage water in the Four Corners? In this game, the balls represent how much water falls in a year. How much do you think should go to each different use during a rainy year? How about during a drought or extreme drought?

### Ready to play?

1. Press the reset button
2. Turn the wheel to fill the cloud with water
3. Choose where you want the water to go
4. Choose how much water you want to fall
